## 1 [Client-server computing in mobile environments](#)

Jin Jing, Abdelsalam Sumi Helal, Ahmed Elmagarmid

June 1999 **ACM Computing Surveys (CSUR)**, Volume 31 Issue 2

**Publisher:** ACM Press

Full text available: [pdf\(233.31 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [reference](#), [index terms](#), [review](#)

Recent advances in wireless data networking and portable information appliances engendered a new paradigm of computing, called mobile computing, in which user portable devices have access to data and information services regardless of their location or movement behavior. In the meantime, research addressing information in mobile environments has proliferated. In this survey, we provide a concrete framework for the categorization of the various ways ...

## 2 [An experimental object-based sharing system for networked databases](#)

Doug Fang, Shahram Ghandeharizadeh, Dennis McLeod

April 1996 **The VLDB Journal — The International Journal on Very Large Data**  
 Volume 5 Issue 2

**Publisher:** Springer-Verlag New York, Inc.

Full text available: [pdf\(195.97 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [index terms](#)

An approach and mechanism for the transparent sharing of objects in an environment of interconnected (networked), autonomous database systems is presented. An experimental prototype system has been designed and implemented, and an analysis of its performance has been conducted. Previous approaches to sharing in this environment typically rely on the

global, integrated conceptual database schema; users and applications must pose this new level of abstraction to access remote informatio ...

A number of dynamic cache consistency protocols have been developed for multiprocessors having a shared bus interconnect between processors and shared memory. The performance of these protocols has been studied extensively using simulation and analytical models based on Markov chain techniques. Both of these approaches use detailed models, which capture cache and bus interference rather precisely, but which are highly expensive to evaluate. In this paper, we inv ...

[terms](#)

We describe the use of object-oriented programming (OOP) in the design and implementation of TSA, a system for interactive time series and spectral analysis. We show how some of OOP as inheritance, generic messages, and decomposition of the programming terms of objects have contributed to our goal of providing an extensible data analysis system. We discuss the strengths and limitations of both OOP and the particular implementation used (Flavors on a Symbolics ...
